CORDOBA

HIGH PERFORMANCE

INERTIA DRIVEN

CORDOBA — THE 12 GA. THAT KICKS LIKE A 20 GA.

Benelli engineers designed the Cordoba as a lightning fast hunting gun with all the advanced features of a serious sporting clays gun. When ammo for a morning dove hunt is measured in cases instead of boxes, nothing beats the Benelli Cordoba. The Cordoba's ComforTech stock dampens felt recoil by nearly 50% more than comparable shotguns, even though it weighs about a pound less. That's a lot of weight, in fact over a ton, because you mount your gun over 2,000 times on an average day of Argentine dove hunting. The ComforTech system also reduces muzzle climb and puts you back on target up to 69% faster than other brands. If that's not enough, the Cordoba comes standard with Benelli's legendary Inertia Driven operating system and a stock that's quickly adjustable for your own personal dimensions. Put it all together and you have the best shooting machine ever devised by man. Or in other words... you have a Cordoba.
